★ PROFILE

I always use my experience to push up my client/company. After finding a solution, I strive to improve and simplify that. I want to specialise cloud systems, especially AWS.

I have EU Blue Card and it needs to be transferred if I get a full-time offer. I am also open for contract based offers.

Birth Date: March 5, 1994
Marital Status: Single
Willing to Travel / Move: Yes
Salary Expectation: €53.000 - €60.000
Availability: Now

★ EXPERIENCE

- SOFTWARE ENGINEER, CS CLASSIS GMBH; GERMANY; 02.2019 - PRESENT

I am giving support to MBR Turkey Ltd. At the same time, I am supporting some companies as a software engineer.

Keywords: PHP, MySQL, Symfony, AWS, Shopware

- SOFTWARE ENGINEER, MBR TURKEY LTD; ISTANBUL, TURKEY; 08.2018 - 02.2019

MBR Turkey is the Turkey distributor of the brand MBR.

- I made their job easier for 2 years with my invoicing & stocking software.

- I developed a sales tracking application and now they can track their sales at 3rd party sellers in real-time. Also, sales representatives can see their progress with this application.

Keywords: Python, MariaDB, Django, HTML, CSS, JS, SPA, Vue.js, React Native, Lightsail, OpenLiteSpeed, Server Management

- **FULL STACK DEVELOPER, NTROY LTD; ISTANBUL, TURKEY;
02.2017 - 08.2018**

- As a part of the IT team, I had a lot of effort in their core system. I proposed a micro-service based system, and with this system, they can scale their API with a single click.
- I created an administration panel with that system. The management team can manage and make reports for all of the games with this panel.
- I created a mobile application that allows our users to access news & campaigns easily.

Keywords: PHP, MariaDB, Laravel, Silex, HTML, CSS, JS, Vue.js, React Native, Aliyun, Docker, Server Management

- **FULL STACK DEVELOPER, FREELANCE; ISTANBUL, TURKEY;
09.2012 - 02.2017**

I worked on a lot of projects at this time. Some of them are below; others can be given on request.

- **MOBILE APPLICATION; GARENITA**

[Garenta](#) is one of the biggest car rental companies in Turkey. I made an android application for them. With that app, people can rent a car for them and/or their companies easily.

Keywords: Java, Android, SAP, Web Services

- **MOBILE APPLICATION; YENIBIRIS.COM**

[yenibiris.com](#) is one of the biggest job search website in Turkey. I made an android application for them. People can reach jobs they like with their mobile phones.

Keywords: Java, Android, Web Services, SOAP

- WEBSITE; MEDYA TAKIP MERKEZI

[Medya Takip Merkezi](#) has a project called "[Geçmiş Gazete](#)" which shows past news on that day. I made a website with my colleague for them. With its retro design, I believe people are having fun while browsing.

Keywords: PHP, MySQL, Laravel, HTML, CSS, JS, Varnish, Centos, Server Management

- HTML 5 GAME; AKBANK

"[Ekonominin Kahramanı Çocuklar](#)" is a project of Akbank, one of the biggest banks in Turkey. It aims to teach some economical basics to kids. I worked on the game part. That was my first game project and I really enjoyed while working.
